Thanks to continuous growth and development, Wellis Magyarország Zrt. is now the largest spa manufacturer in Europe. As a domestic producer, it is the market leader amongst the wellness equipment manufacturers and distributors of Hungary.

Since the company was founded in 2003, more and more people are choosing Wellis products across Europe. The increasing demand for a healthy lifestyle increases the demand for quality wellness products. Thanks to continuous development and growth, Wellis has now become the largest hot tub manufacturer on the European market. We produce hot tubs, swim spas, their associated thermal roofs and pool side coverings, involving more than 1000 people at a total area of 50,000 m². The construction and continuous expansion of the huge plant, which is equipped with modern manufacturing tools was motivated by the growing market demand and the pursuit of quality manufacturing technology. Our products are stored in several warehouses. In the second half of 2020, we also acquired our second site in Ózd, and in 2021 we started manufacturing the hot tubs and employing another 800 employees. The two production units are available with a huge capacity – we could produce 100,000 hot tubs a year – which could make us one of the world's leading manufacturers in the next few years. There could be no more material proof of our company's international recognition than the many awards that our products win at exhibitions around the world. They represent the excellence and quality that has resulted in more than 18 years of professional experience. We currently sell 30,000 Wellis hot tubs per year at more than 500 points of sale worldwide.
